Acme Annual Report

Executive Summary

This year Acme grew **revenue by 42%** and launched three new products. Details are in the *financial overview* below. Visit our website for more. Loyalty programs reward repeat customers with points that can be redeemed for discounts, free items, or exclusive perks. Merchants use them to raise visit frequency and average order value, while customers enjoy tangible value for purchases they would have made anyway. Well-designed programs are simple to understand and quick to pay out.

Loyalty programs reward repeat customers with points that can be redeemed for discounts, free items, or exclusive perks. Merchants use them to raise visit frequency and average order value, while customers enjoy tangible value for purchases they would have made anyway. Well-designed programs are simple to understand and quick to pay out.

Key Highlights

- Opened 12 new regional offices.
- Customer retention improved to 91% across all segments, the highest level in the company's history.
- Launched the mobile rewards app.

Priorities for next year

1. Expand into two new markets.
2. Reduce churn below 5%.
3. Ship the partner API.

Financial Overview

Quarterly results are summarised in the table below.

Quarter	Revenue ($M)	Growth	Margin
Q1	12.4	8%	21%
Q2	14.1	14%	23%
Q3	15.9	13%	24%
Q4	18.2	15%	26%

Revenue by region (chart):

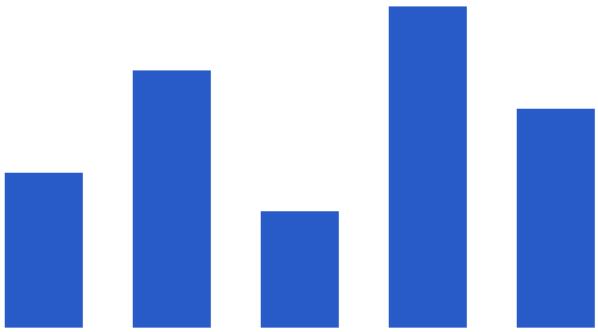

Figure 1. Revenue by region.

Regional Breakdown

The borderless table below lists regional performance.

Region	Stores	Revenue	Change
North	42	$18.1M	+12%
South	35	$14.7M	+9%
East	28	$11.2M	-3%
West	51	$22.9M	+18%

Integration Example

Merchants can award points with a single API call:

```
import requests

def award(customer_id, points):
    return requests.post("/v1/points",
        json={"customer": customer_id, "points": points})
```

Loyalty programs reward repeat customers with points that can be redeemed for discounts, free items, or exclusive perks. Merchants use them to raise visit frequency and average order value, while customers enjoy tangible value for purchases they would have made anyway. Well-designed programs are simple to understand and quick to pay out.
